

Challenge and Reconstruct Learning (ChaRL)

USAID Mekong Adaptation and Resilience to Climate Change (Mekong ARCC)

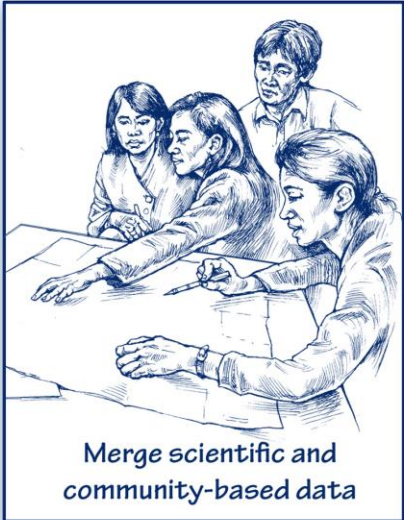

Regionalize global climate models; fine-tune at the province level; identify climate thresholds for key livelihoods/resources

Science-based vulnerability assessment

Merge scientific and community-based data

Gather community data on local factors (livelihoods, weather events/trends, microclimate, socio-economics)

Community-based vulnerability assessment

Adaptation plan - technical expert review, feedback, and finalization

Adaptation plan - generated / revised by community
