

Session 1: Green Technologies for Climate Action and Environmental Sustainability

- Key challenges for **green technologies for climate action and environmental sustainability** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action
- Advantages /disadvantages in adopting a regional approach

Session 2: Financing Sustainable Infrastructure and Low-Carbon, Climate-Resilient Technologies

- Key challenges for **financing sustainable infrastructure and low-carbon climate-resilient technologies** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action
- Advantages /disadvantages in adopting a regional approach

Session 3: Pollution Control and Sustainable Waste Management

- Key challenges for **pollution control and sustainable waste management** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action
- Advantages /disadvantages in adopting a regional approach

Session 4: Climate-Smart Ecosystem Landscapes

- Key challenges for **climate-smart ecosystem landscapes** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action
- Advantages /disadvantages in adopting a regional approach

Session 5: Decarbonization of Agriculture, Energy & Transport Sectors

- Key challenges for **decarbonisation of agriculture, energy & transport sectors** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action
- Advantages /disadvantages in adopting a regional approach

Session 6: Climate Change Adaptation and Disaster Risk Management

- Key challenges for **climate change adaptation and disaster risk management** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action
- Advantages /disadvantages in adopting a regional approach

Session 1: Greening of Agri-food Supply Chains

- Key challenges for **greening of agri-food supply chains** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action
- Advantages /disadvantages in adopting a regional approach

Session 2: Inclusive and Gender-Conscious Food Value Chains

- Key challenges for **inclusive and gender-conscious food value chains** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action
- Advantages /disadvantages in adopting a regional approach

Session 3: Financing Climate-Friendly Agribusinesses

- Key challenges for **financing climate-friendly agribusinesses** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action
- Advantages /disadvantages in adopting a regional approach

Session 4: Food Safety and Quality Standards, Certification and Traceability

- Key challenges for **food safety and quality standards, certification and traceability** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action.
- Advantages /disadvantages in adopting a regional approach

Session 5: Cross-border Animal Health and Value Chain Improvement

- Key challenges for **transboundary animal diseases and livestock value chain improvement** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action
- Advantages /disadvantages in adopting a regional approach

Session 6: Water for Food Security in a Changing Climate

- Key challenges for **water for food security in a changing climate** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action.
- Advantages /disadvantages in adopting a regional approach

Session 7: Agricultural Adaptation in the context of Water-Food-Energy Nexus

- Key challenges for **agricultural adaptation in the context of water-food-energy nexus** (e.g. enabling policies, capacities and investments in infrastructure)
- Current efforts of your country/organization (e.g. policies, building capacities and mobilizing investment for infrastructure). Best practices that could be replicated.
- 3-4 key priorities for action.
- Advantages /disadvantages in adopting a regional approach
